

SANDESH DHAKAL

Frontend Developer | React.js / Next.js / TypeScript

sandeshd531@gmail.com | 9863990339 | Lalitpur, Nepal | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience delivering production-quality web applications in Next.js 14, TypeScript, and Redux Toolkit. Completed a 4-month internship at Nepware Pvt. Ltd., a 1-month trainee role at TechYatra Labs, and a Front-End AI Engineering Internship at FlyRank AI — including a dedicated General AI Fluency track. Currently building SwiftShip, a full-stack driver/delivery marketplace with Khalti and eSewa payment integration, real-time GPS tracking, and in-app chat. Comfortable working within senior-led review processes, maintaining strict code quality standards, and leveraging modern AI tools to accelerate development.

WORK EXPERIENCE

Front-End AI Engineering Intern | FlyRank AI, Remote

July 2026 – September 2026

- Completed the Front-End AI Engineering track, finishing practical assignments across site foundations, responsive execution, and storefront patterns (Shopify/Shopline-style).
- Built responsive, mobile-first UI components using Tailwind CSS and AI-assisted implementation workflows and QA.
- Developed capstone project "General AI Fluency Impact Project" — reviewed and approved by the lead track mentor — with full GitHub documentation following Conventional Commits standards.
- Established personal developer identity kit including typography (JetBrains Mono / IBM Plex Sans), color palette, and monogram branding.

General AI Fluency Intern | FlyRank AI, Remote

July 2026 – September 2026

- Completed the General AI Fluency track as part of the FlyRank AI Internship program, gaining structured proficiency across leading AI tools and workflows.
- Applied Claude, ChatGPT, Gemini, and Perplexity across real frontend development tasks including prompt engineering drills, portfolio case studies, and AI-assisted implementation.
- Built practical proficiency in leveraging AI tools for development, QA, and developer productivity in a remote, project-based learning environment.
- Completed proof statements and portfolio case studies demonstrating AI fluency across multiple tools and use cases.

Frontend Developer Trainee | TechYatra Labs, Kathmandu

April 2026 – May 2026

- Built PLMS-Frontend (MentorAI/EdNova) — a personalized LMS for Nepali SEE students — using Next.js 14, TypeScript, TanStack Query, Zustand, Shadcn/ui, Zod, and Tailwind CSS with a Django REST Framework backend.
- Developed the TutorHub module end-to-end: student listing page, tutor profile UI, and layered API integration with debounced search, toast notifications, and cache-invalidation on mutations.
- Built the Classroom module (calendar strip, session status, Zoom join), School Management System with Nepali Bikram Sambat calendar, and the full TechYatra Labs marketing website from Figma designs (Next.js 14, Framer Motion).
- Maintained Conventional Commits workflow, cleaned legacy mock files post-integration, and followed strict code quality standards via PR reviews.

Frontend Developer Intern | Nepware Pvt. Ltd., Kathmandu

January 2026 – April 2026

- Architected a Motorcycle Inventory Management System from the ground up using Next.js 14, TypeScript, Redux Toolkit, Tailwind CSS, and MongoDB — covering inventory CRUD, authentication, wishlisting, and real-time notifications.
- Designed a full Purchase Order lifecycle — from drawer-based creation through status transitions (Confirmed, Delivered, Completed) — with row-level UI disabling and automated PDF export on completion.

- Built a 60-second Redux polling notification system with unread badge, paginated dropdown, and mark-as-read; plus a context-based Toast system with configurable stacking limits.
- Maintained professional Git workflow: feature branches, single-commit PRs, Conventional Commits, Husky pre-commit hooks, and code review cycles with senior developer feedback.

TECHNICAL SKILLS

Frontend: Next.js 14, React.js, TypeScript, Tailwind CSS, Redux Toolkit, Zustand, HTML5, CSS3

UI Libraries: Material UI (MUI), Shadcn/ui, React Hook Form, Recharts, Lucide React

Backend and APIs: REST APIs, JWT Bearer Auth, MongoDB, Mongoose, Next.js API Routes, TanStack Query, Zod, Pusher, Long Polling

AI Tools: Claude, ChatGPT, Gemini, Perplexity, Claude Code, Cursor — prompt engineering and AI-assisted development

Dev Tools: Git, GitHub, Postman, ESLint, Prettier, Husky, Commitlint

PROJECTS

SwiftShip — Driver and Delivery Marketplace

Next.js 14 | TypeScript | MongoDB | Tailwind CSS | Khalti | eSewa | Pusher | Leaflet | Auth.js

[GitHub](#) | [Live](#)

- Full-stack Nepal-only driver/delivery marketplace with poster, driver, and admin roles — featuring multi-step job posting, driver verification upload, real-time GPS tracking (Leaflet + OSRM), and in-app live chat via Pusher.
- Integrated Khalti and eSewa v2 (HMAC-SHA256) payment gateways, cookie-based JWT auth with Google OAuth (Auth.js), and RBAC middleware for role-protected routes.
- Structured API layer with separated domain-based routes, earnings dashboard, ratings/reviews system, admin payout panel, and production-readiness audit across 66 files.

Motorcycle Inventory Management System

Next.js 14 | TypeScript | Redux Toolkit | Tailwind CSS | MUI | MongoDB | JWT

[GitHub](#) | [Live](#)

- Full inventory platform with purchase order flow, RBAC admin job card module, authentication, wishlist, real-time notifications, AI chatbot drawer, bulk delete, server-side filtering, pagination, and PDF export — built during internship at Nepware Pvt. Ltd.

PLMS-Frontend — MentorAI / EdNova

Next.js 14 | TypeScript | TanStack Query | Zustand | Shadcn/ui | Zod | Tailwind CSS

- Personalized learning platform for Nepali SEE students featuring TutorHub module, Classroom module, layered API architecture, debounced search, and Bikram Sambat calendar integration with Django REST Framework backend.

FlyRank Capstone — General AI Fluency Impact Project

Next.js | Tailwind CSS | AI Tools | Conventional Commits | GitHub

[GitHub](#) | [Live](#)

- Capstone project completed as part of FlyRank AI Internship — approved by lead track mentor. Demonstrates AI-integrated frontend workflows, responsive UI patterns, and structured project documentation.

FLYRANK INTERNSHIP — MINI PROJECTS

Streaming Chat App

Next.js | AI Streaming | TypeScript

[GitHub](#) | [Live](#)

- Real-time AI streaming chat interface built as part of the FlyRank frontend engineering track.

Buttons with Brain

Next.js | AI | Tailwind CSS

[GitHub](#) | [Live](#)

- AI-powered interactive button components demonstrating intelligent UI behavior and frontend AI integration.

Shader Hero

[Next.js](#) | [WebGL](#) | [GLSL Shaders](#) | [Three.js](#)

[GitHub](#) | [Live](#)

- Hero section with custom GLSL shader effects, demonstrating advanced frontend visual engineering skills.

3D Scene

[Next.js](#) | [Three.js](#) | [3D Rendering](#)

[GitHub](#) | [Live](#)

- Interactive 3D scene built with Three.js, showcasing real-time rendering and 3D UI integration in a web app.

Accessible Components

[Next.js](#) | [Tailwind CSS](#) | [ARIA](#) | [Accessibility](#)

[GitHub](#) | [Live](#)

- A library of accessible, ARIA-compliant UI components built as part of the FlyRank frontend engineering curriculum.

EDUCATION

B.Sc. CSIT | Nagarjuna College of Information Technology, Kathmandu

2021 – December 2025

Tribhuvan University

CERTIFICATIONS AND TRAINING

- FlyRank AI — Front-End AI Engineering Track (July – September 2026)
- FlyRank AI — General AI Fluency Track (July – September 2026)
- Recommendation letter issued by Alen Malkoc, Founder and CEO, FlyRank AI — [verified at internship.flyrank.ai](#)
