SKILLS

- Python (Basic)
- HTML/CSS (Basic)
- Flutter (Basic)
- React
- SQL (Basic)

Frameworks & Libraries

- Flask
- Pandas
- **scikit-learn**
- matplotlib

Concepts

- REST APIs
- JSON
- CRUD Operations
- OOP

Tools

- Git
- GitHub
- Postman

PERSONAL STATEMENT

Motivated and fast-learning Python developer with intermediate-level expertise and practical experience in backend development using Flask and REST APIs. Skilled in creating functional API-driven applications, managing version control with Git, and collaborating effectively within student project teams. Additionally experienced in building responsive user interfaces using HTML and React. Eager to expand hands-on experience through a remote internship and contribute to real-world development projects.

EDUCATION

January 2021 - Expected graduation December 2025

Bachelor Bsc.csit

Nagarjuna college of IT, sankhamul

PROJECT EXPERIENCE

Barcode – Multipurpose Document Scanner

GitHub: github.com/nij22370/Barcode

Built a full-stack React + FastAPI web app to upload and decode barcodes, PDF417 codes, checkbooks, and cards, generating a combined PDF report. Implemented image processing with OpenCV, Pillow, pyzbar, and reportlab, with modular frontend/backend structure and secure session-based upload handling.

SujhavMitra – Flask API

GitHub: github.com/rohankarmacharya/SujhavMitra

Developed a Flask-based recommendation API with JWT authentication, bcrypt hashing, and MySQL integration. Built modular REST endpoints for login, signup, and content retrieval, and tested workflows via Postman with clean Git/GitHub version control.

Unsad – Cross-Platform Meme App

GitHub: github.com/nij22370/unsad.git

Created a Flutter-powered meme application for Android, iOS, Web, Windows, and macOS, focusing on modular architecture and smooth UX. Designed the foundation for meme feeds, sharing features, and mood-based content recommendations.
